AERODROME SAFETY

- Detects potential UAV targets in/near the control zone
- Identifies drone identity and location of UAV operator

UAV DETECTION

UAV IDENTIFICATION

UAV AIRSPACE MANAGEMENT

- Digital tools help UAV operators fly by the rules
- Enables UAVs to be seen by each other and GA

UAV PILOT TOOLS

UAV TRACKING

NATIONAL UAV INFRASTRUCTURE

- Enables beyond-visual-line-of-sight operations
- Humanitarian and commercial operations
- Optimal procedures and routes to fly

BVLOS OPERATIONS

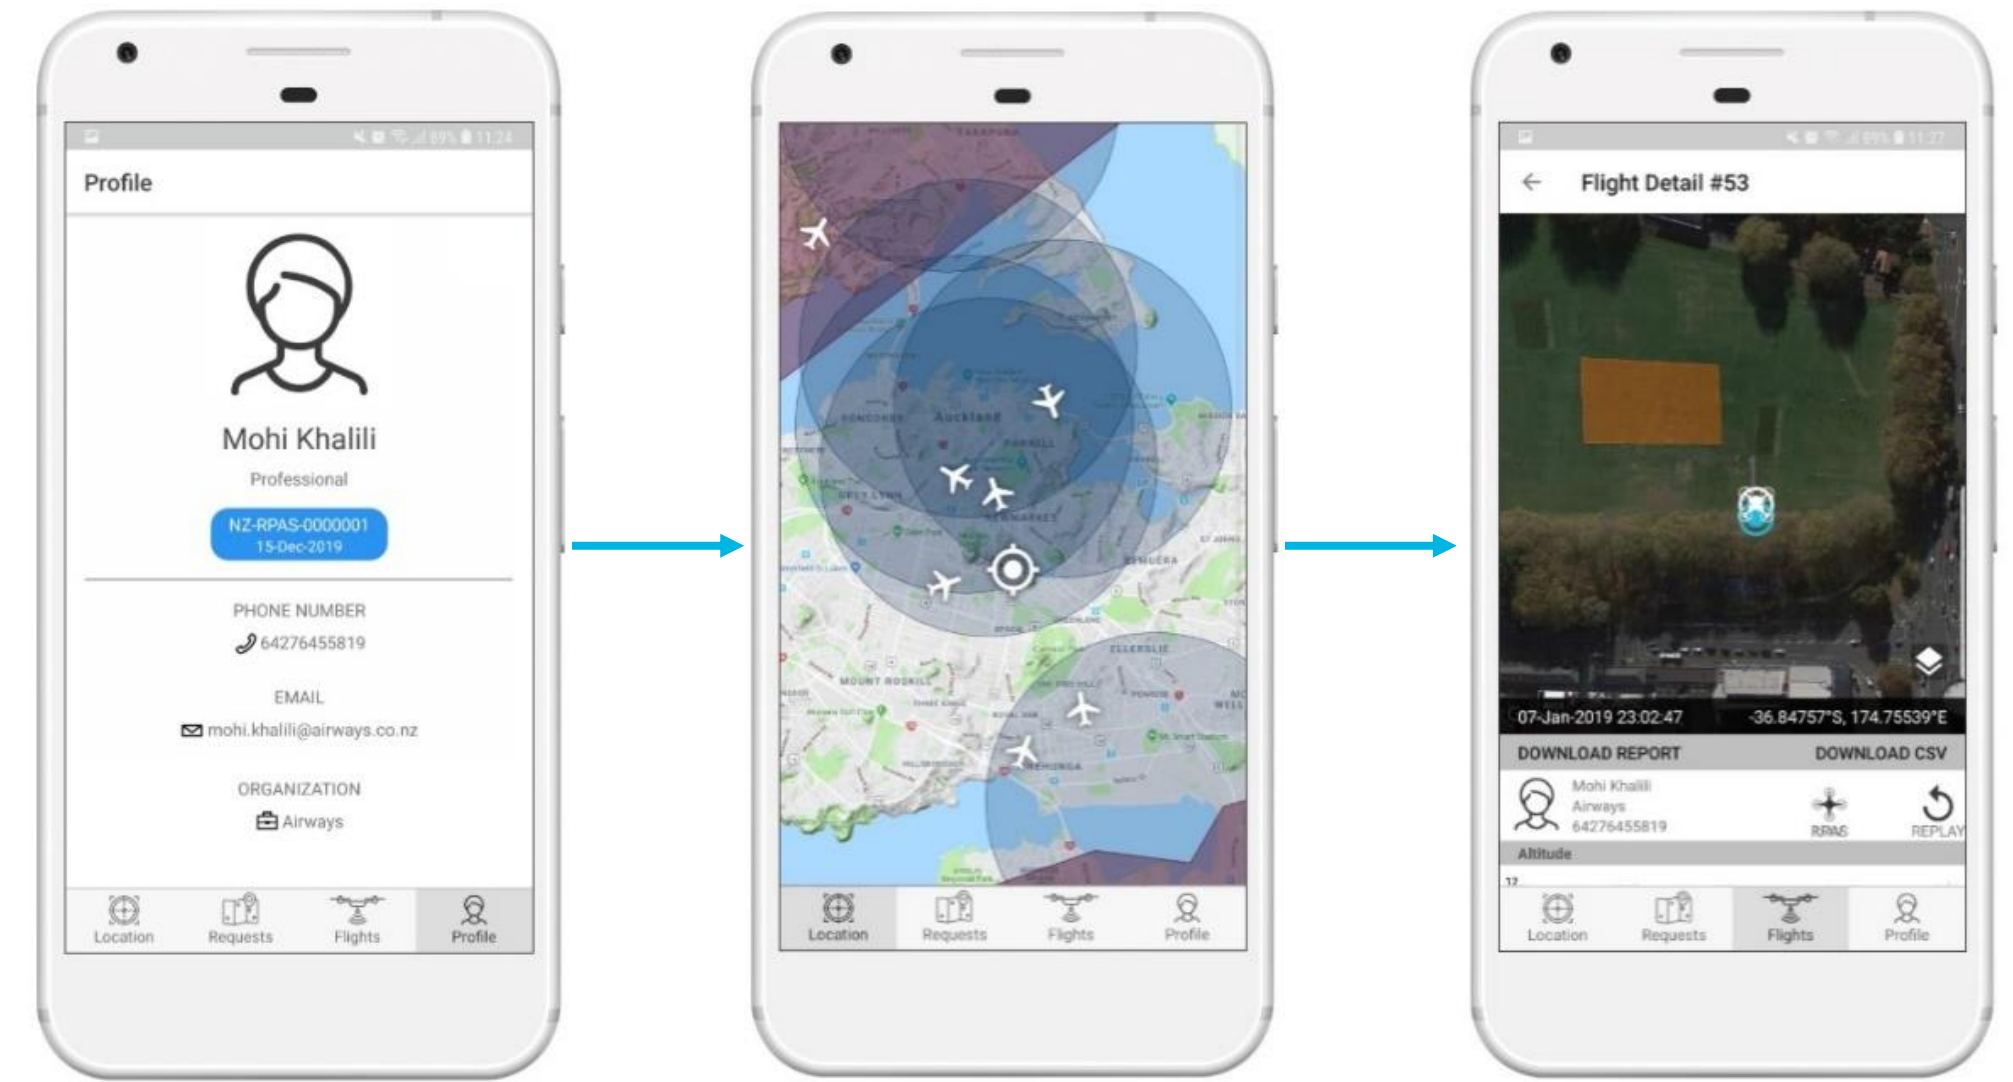

AIRSPACE PROCEDURES

UAV AIRSPACE MANAGEMENT

Flight information service across controlled and uncontrolled airspace:

- Airspace maps/ rules
- Land owner maps/ rules
- Controlled airspace integration/separation
- Situational awareness
- Live flight monitoring
- NOTAM, obstacle data

Goal: Lay the foundation to enable safe and efficient beyond-visual-line-of-sight operations

- Bethells Beach trial testing usability of technology to enable BVLOS operations.
- ADS-B and LTE devices being tested for C2 (command and control) and DAA (detect and avoid).

Global UTM Association About Us ▾ Membership ▾ Publications ▾ Events ▾ Blog Newsletter Members Login 🔍

The Global UTM Association (GUTMA) is a non-profit consortium of worldwide Unmanned Aircraft Systems Traffic Management (UTM) stakeholders. Its purpose is to foster the safe, secure and efficient integration of drones in national airspace systems. Its mission is to support and accelerate the transparent implementation of globally interoperable UTM systems. GUTMA members collaborate remotely.
