

[REDACTED]
MVR Applications

By e mail:

Reference: [REDACTED]

Thank you for your e mail to our Office Administrator regarding our application for authority to access the Motor Vehicle Register.

We are a fully licenced Private Investigation and Security Company.

All our staff are Licenced Private Investigators and security staff.

We have two main facets to our company being the Security and camera side and then the Private Investigation side.

In relation to the camera sales and installation we have three full time staff involved in this, all licenced.

We have many high profile clients who for confidentiality reasons we would prefer not to disclose however are willing to discuss this further in confidence should it be necessary.

We do both overt and covert cameras and respond to footage obtained from these cameras.

We frequently work closely with [REDACTED] in providing them with camera footage.

In relation to our Private Investigations again we work for many high profile companies in this capacity.

We are highly confidential and all our information gathered is done so within the statutory and moral restrictions.

We are not in the business of passing on information or selling information to third parties as are some companies who have access to the Motor vehicle register at present.

Often we need immediate access to the details of the owner of a particular vehicle and this can be the difference between recovering property and apprehending offenders.

We would like the opportunity if possible to come to Wellington and speak with the panel to demonstrate how we use this information.

Regarding case studies:

- a. [REDACTED]
[REDACTED] This operation required immediate use to the vehicle registration details in order to cross reference observations

and establish the identity of the offenders and addresses, places they were frequenting. We worked closely with [REDACTED] who I am sure will speak highly of our company the way we operate. We could possibly obtain a written reference if necessary.

- b. We have a long standing contract with a top New Zealand Company which involves recovering their property which is leased out and often not returned. This involves constant surveillance of premises and vehicles culminating in operations to recover the property and attempt to recover outstanding costs to our client.
- c. Last week we had an incident where an overt camera was stolen from the outside of another clients premises, on reviewing the camera footage we identified a vehicle registration number for the offenders and needed to establish the registered owner of this vehicle as soon as possible.
- d. We specialise in staff and work place theft and frequently urgently need the registered owners details of vehicles we have under surveillance.

SUMMARY:

As mentioned previously if you feel it would be advantageous we would like to come and present to the board.

I would like to re enforce that all our staff are Fully Licenced and aware of the statutory regulations relating to their duties and the information they gather. I am sure we could obtain references from some of our clients if you feel this is also necessary.

I can be contacted on [REDACTED] or 09 2624455

Yours truly
